

Brent came into the program in December 2014, he was enrolled in the CNC machinist program and was needing assistance with funding and job placement. He completed the machinist program and got a job at Cameron, making \$20.00 an hour. As client was about to exit the WIOA program, Cameron did lay-offs and Brent was back to square 1. Brent decided to go back to school to get his Associates degree, so he was marketable. He received aided from his pell grant and some tribal funds, and WIOA helped with incentives. Brent had just completed his associates and was started to look for employment in December 2017. CN Trini had told Brent that he needed to complete Dynamic futures class and then he could be placed at a WEX or even an OJT. While Brent was participating in Dynamic Futures the Shawnee CN position opened up, and CN Trini and Brent talked about the position and how CN thought Brent should apply. Brent applied with Dynamic Workforce Solutions and he was offered the position and started on 02/02/18. Brent is now the new WIOA CN at the Shawnee Office. Brent is very happy and knows he will do a great job assisting clients in pursuing their career pathways.
