

Hello, my name is Tania Valentin I am 20 years old and a single mother of one. Going to school and working full time was a challenge for me and my new born child. Thanks to the Oklahoma workforce WIOA Young adults program, I was able to start on my dream career. They have helped me in so many ways I am truly blessed to been able to be in this program, without it I wouldn't have been able to make it as far as I have. The funds I received has help me go to dental assistant school, and has helped me with getting experience by doing a work experience as a Dental assistant. Which with that work experience I was able to found employment at a dental clinic as dental assistant. Thanks to the young adult program in less than a year I became a dental assistant and work a part time job as a dental assistant plus being able to be a full-time student at OCCC to obtain my major in Associates in science. With the help of the program, I know I will be able to succeed in life and being able to raise my son to be successful.
