

Hello, my name is Jamelia, I started the workforce program in 2016. That is also when I started LPN program at Metro Tech Spring Lake. My life before was somewhat a struggle, but I thank god workforce helped me. I did not have to worry how I was going to pay for school. When I started with workforce, I was employed making \$13 an hour as a staffing coordinator. Once I completed my LPN I was started making \$16 an hour. I didn't want to stop as an LPN so I went on and got my RN. Now I'm employed as an RN and I make \$23 an hour . Jessica is my Career Navigator, and I couldn't ask for a better Career Navigator. I can say we built a friendship throughout the process. I had a baby in my 4th semester of nursing school and through it all Jessica helped keep me motivated when times were hard. Since workforce helped pay for my training, I was able to take care of my family while in training and now that I am a RN.
